INTRODUCTION

1
2 In this case, Plaintiffs (fishermen) challenge a final rule recently adopted by
3 Defendants (the Service) terminating the Southern sea otter management zone and
4 its protections for southern California fisheries and fishermen. The Service moves
5 to dismiss on both failure to state a claim and jurisdictional grounds, but both raise
6 a single issue—whether the statute of limitations has run on Plaintiffs’ claim. The
7 statute of limitations for challenging final agency actions under the Administrative
8 Procedure Act (APA) is six years. On December 19, 2012, the Service adopted a
9 rule exposing fishermen to criminal prosecution despite a statutory exemption for
10 their activities. On July 31, 2013—only seven months after the rulemaking became
11 final—the fishermen filed this complaint. Because the complaint was filed less than
12 six years after the rulemaking became final the Service’s Motion to Dismiss must be
13 denied.

14 The Service argues otherwise. It claims that, because the fishermen’s statutory
15 argument would mean that a regulation adopted in 1987 is also illegal, the fishermen
16 could only have brought their claim in a challenge to the 1987 regulation. But the
17 Service’s argument overlooks a key distinction between this case and those on which
18 it relies—the more recent final agency action challenged here. In the cases
19 dismissing APA claims as time-barred, the plaintiffs challenged the continued
20 enforcement of a regulation adopted more than six years earlier. But in none of these
21 cases did the plaintiff challenge an agency action that became final within six years
22 of the filing of the complaint. Nor did the courts dismiss a timely-filed complaint
23 on the grounds that its legal arguments would imply that an older regulation was also
24 illegal. Because the APA gives the fishermen the right to challenge the 2012
25 rulemaking as inconsistent with the statute if brought within six years of when it
26 became final, the fishermen have sufficiently stated a claim which this Court has
27 jurisdiction to hear.

BACKGROUND

1
2 In 1986, Congress adopted P.L. 99-625, 100 Stat. 3500 (1986), authorizing the
3 Service to relocate California sea otters outside their then existing range. Complaint
4 for Declaratory and Injunctive Relief (Compl.) ¶ 27. The statute also imposes
5 conditions on this authority, including: an obligation that the Service establish a
6 “management zone” surrounding the newly created population; remove any otters
7 found within this zone using all feasible nonlethal means; and an exemption from the
8 provisions of the Marine Mammal Protection and Endangered Species Acts for any
9 person who, while engaged in an otherwise lawful activity, harms an otter in this
10 zone. Compl. ¶¶ 27-30. Although the Service’s decision to exercise the authority
11 granted in the statute was discretionary, these conditions became mandatory once
12 exercised—the statute provides no authority for the Service to excuse itself from
13 these obligations. Compl. ¶ 31.

14 In 1987, the Service exercised the authority given in the statute by adopting
15 a regulation establishing the translocation program and a management zone from
16 Point Conception to the Mexican border. Compl. ¶¶ 32-33; 52 Fed. Reg. 29,754
17 (Aug. 11, 1987). In this 1987 regulation the Service also asserted—but did not
18 exercise—the authority to declare the program a failure and annul the statutory
19 conditions. Compl. ¶ 34.

20 Twenty-five years later, the Service adopted a final rule terminating the
21 program and relieving itself of its obligations under the statute. Compl. ¶ 53; 77 Fed.
22 Reg. 75,266 (Dec. 19, 2012). In doing so, the Service relied on the assertion of
23 authority and termination criteria contained in the 1987 regulation. Compl. ¶ 53; 77
24 Fed. Reg. 75,266.

25 This 2012 rulemaking is the subject of the fishermen’s suit. Compl. ¶ 1. They
26 assert that it is illegal because the Service cannot avoid these conditions having
27 exercised the authority to which Congress attached them. *Id.*

28 ///

ARGUMENT

The Service moves to dismiss this challenge to the 2012 rulemaking as time-barred. Def.’s Not. of Mot. & Mot. to Dismiss at 2. The 2012 rulemaking was adopted as a final rule on December 19, 2012. Compl. ¶ 53; 77 Fed. Reg. 75,266. The APA provides a cause of action to challenge any final agency action. 5 U.S.C. § 704. The statute of limitations for these challenges is six years from the date that the agency action became final. 28 U.S.C. § 2401(a); *Hells Canyon Pres. Council v. U.S. Forest Serv.*, 593 F.3d 923, 930 (9th Cir. 2010). Because the fishermen filed this case challenging the 2012 rulemaking—a final agency action subject to judicial review under the APA—less than eight months after it became final, its challenge cannot be dismissed as time-barred.

I

**THE FISHERMEN’S CHALLENGE TO
THE 2012 RULEMAKING CANNOT BE
DISMISSED BECAUSE IT WAS BROUGHT
LESS THAN SIX YEARS AFTER IT BECAME FINAL**

The APA provides a cause of action to challenge any final agency action for which there is no other adequate opportunity for judicial review. 5 U.S.C. § 702. A formally adopted final rule is a “final agency action” under this section. *See Shiny Rock Mining Corp. v. United States*, 906 F.2d 1362, 1363 (9th Cir. 1990).

Here, the Service adopted a final rule, the 2012 rulemaking, excusing it from complying with the conditions in the statute. Compl. ¶¶ 53-54; 77 Fed. Reg. 75,266. Because neither the statute nor any other law provides the fishermen an adequate opportunity to obtain judicial review of this final agency action, they have a claim under the APA. *See* 5 U.S.C. § 702; P.L. 99-625.

The statute of limitations for APA claims is six years from the date that the claim arose. 28 U.S.C. § 2401(a); *Hells Canyon Pres. Council*, 593 F.3d at 930. An APA challenge to a final agency action arises when the action becomes final. *See*

///

PACIFIC LEGAL FOUNDATION
930 G Street
Sacramento, CA 95814
(916) 419-7111 FAX (916) 419-7747

1 5 U.S.C. § 704. For purposes of a rulemaking, this is when it is adopted as a final
2 rule and published in the federal register. *See Shiny Rock*, 906 F.2d at 1363.

3 The 2012 rulemaking became final on December 19, 2012, when it was
4 adopted as a final rule and published in the federal register. *See 77 Fed. Reg.* 75,266.
5 The time for bringing an APA challenge to the 2012 rulemaking will expire on
6 December 18, 2018. *See 28 U.S.C. § 2401(a)*. The fishermen filed their complaint
7 on July 31, 2013. *See Compl.* Because the fishermen filed their challenge to the
8 2012 rulemaking less than six years after it became final, they have alleged a valid
9 APA claim which cannot be dismissed under Rule 12(b)(6).¹

10 II

11 THE FISHERMEN DO NOT 12 MERELY CHALLENGE THE CONTINUED 13 ENFORCEMENT OF A REGULATION 14 MADE FINAL MORE THAN SIX YEARS AGO

14 The Service's argument obscures the essential distinction between this case
15 and those on which it relies—less than a year ago the Service took a final agency
16 action that is subject to challenge under the APA. That agency action—the 2012
17 rulemaking—is invalid because it exceeds the Service's statutory authority.

18 In the cases on which the Service relies, plaintiffs directly challenged stale
19 regulations more than six years after they became final, and not agency actions of

21 ¹ The Service also moves to dismiss under Federal Rule of Civil Procedure 12(b)(1)
22 on the grounds that this Court has no jurisdiction to hear an APA challenge once the
23 statute of limitations has run. Def.'s Mem. of Ps & As at 13-14. However, the Ninth
24 Circuit has held that the statute of limitations in 28 U.S.C. § 2401(a) is not a bar to
25 jurisdiction. *Cedars-Sinai Med. Ctr. v. Shalala*, 125 F.3d 765, 770 (9th Cir. 1997).
26 Although the Service asserts a belief that *Cedars-Sinai Medical Center* should be
27 overruled according to the reasoning in *John R. Sand & Gravel Company v. United*
28 *States*, 552 U.S. 130 (2008), the Ninth Circuit has not done so. *See Aloe Vera of Am.*
v. United States, 580 F.3d 867, 872 (9th Cir. 2009). Since the Service's argument
is contrary to precedent, this Court cannot dismiss this case as beyond its
jurisdiction.

27 And if *Cedars-Sinai Medical Center* did not foreclose the Service's argument,
28 it would have to be rejected because the fishermen brought their APA challenge to
the 2012 rulemaking within the six-year statute of limitations.

PACIFIC LEGAL FOUNDATION
930 G Street
Sacramento, CA 95814
(916) 419-7111 FAX (916) 419-7747

1 | more recent vintage. These cases concern whether the ongoing enforcement of a
2 | stale regulation can be challenged notwithstanding the fact that the only final agency
3 | action was the adoption of the regulation more than six years earlier. In *Shiny Rock*,
4 | a mining corporation brought a procedural challenge against a rule withdrawing
5 | federal lands from mineral exploitation adopted twenty years earlier. 906 F.2d at
6 | 1363-64. The Ninth Circuit affirmed the dismissal because the statute of limitations
7 | for this challenge ran six years after the rule became final, notwithstanding that this
8 | particular mining corporation did not have standing to sue until later. *Id.* at 1365.
9 | Similarly *Cedars-Sinai Medical Center* was a procedural challenge to a medicare
10 | claims rule made final more than six years before the complaint was filed. *Cedars-*
11 | *Sinai Med. Ctr. v. Shalala*, 177 F.3d 1126, 1128-29 (9th Cir. 1999). The court held
12 | that this direct procedural challenge was time-barred even though the agency
13 | continued to process medicare claims according to the policy. *Id.* at 1129. But the
14 | court was careful to distinguish this case from a challenge to the substance of a rule
15 | or the agency's authority to adopt it. *See id.*

16 | In *Wind River Mining Corporation v. United States*, too, a plaintiff directly
17 | challenged a stale final agency action. 946 F.2d 710 (9th Cir. 1991). In that case,
18 | a mining corporation challenged a rule foreclosing mineral extraction on federal
19 | lands more than ten years after it became final. *Id.* at 711-12. *Wind River*, in
20 | contrast to *Shiny Rock*, challenged the substance of the stale rule and not the
21 | procedure of its adoption. *Id.* at 714. The Ninth Circuit held that, although a direct
22 | challenge against the stale rule was time-barred, the substance could be attacked in
23 | a challenge to a subsequent agency action that relied on the rule, including
24 | enforcement proceedings and denied petitions to rescind the rule. *Id.* at 716. *San*
25 | *Luis Unit Food Producers v. United States*, likewise, was a direct challenge to a stale
26 | rule. 772 F. Supp. 2d 1210 (E.D. Cal. 2011). There, property owners challenged a
27 | policy change by the Bureau of Reclamation that took place more than twenty years

28 | ///

PACIFIC LEGAL FOUNDATION
930 G Street
Sacramento, CA 95814
(916) 419-7111 FAX (916) 419-7747

1 | before the complaint was filed. *Id.* at 1218. They did not challenge any final agency
2 | action taken within six years of the filing of the complaint. *See id.*

3 | To illustrate why these cases are distinguishable from the fishermen’s, suppose
4 | an agency promulgates a regulation prohibiting vehicles from a park. If, ten years
5 | after the regulation became final, a party challenged the continued enforcement of
6 | it as illegal, she would be barred by the statute of limitations. *See Cedars-Sinai*, 177
7 | F.3d at 1129. But if the challenger drove a vehicle into the park and was punished
8 | under the regulations, she would be able to defend herself on the grounds that the
9 | regulation exceeds the agency’s statutory authority. *Wind River*, 946 F.2d at 714.

10 | If a party was unwilling to risk punishment in order to challenge the
11 | regulation, she could also obtain judicial review by petitioning the agency to rescind
12 | the regulation. *See Env’tl. Prot. Info. Ctr. v. Pac. Lumber Co. (EPIC)*, 266 F. Supp.
13 | 2d 1101, 1120-21 (N.D. Cal. 2003). The agency’s failure to satisfy the petition’s
14 | request would be a new final agency action subject to judicial review under the APA.
15 | *See Nw. Env’tl. Advocates v. U.S. E.P.A.*, 537 F.3d 1006, 1018-19 (9th Cir. 2008).

16 | Because they challenge a more recent final agency action, the fishermen’s case
17 | is similar to a challenge to the denial of a petition and not time-barred. The key to
18 | both is that the challenge is directed at a subsequent final agency action for which
19 | the statute of limitations has not run. Moreover, if this Court granted the Service’s
20 | motion, the fishermen could immediately file a petition requesting the rescission of
21 | both the 1987 and 2012 rules. If the Service didn’t rescind both rules, the fishermen
22 | would be entitled to sue the Service to compel it to do so—notwithstanding the fact
23 | that the 1987 regulation was adopted more than 25 years ago. *See Nw. Env’tl.*
24 | *Advocates*, 537 F.3d at 1018-19. But as explained above, this petition process is
25 | unnecessary to give the fishermen a claim under the APA because the 2012

26 | ///

27 | ///

28 | ///

PACIFIC LEGAL FOUNDATION
 930 G Street
 Sacramento, CA 95814
 (916) 419-7111 FAX (916) 419-7747

1 rulemaking is a final agency action subject to challenge under the APA. *See Ctr. for*
 2 *Biological Diversity v. Salazar*, 695 F.3d 893, 904-05 (9th Cir. 2012).²

3 Courts only interpret the statute of limitations to bar substantive challenges
 4 through this petition process where Congress has specifically provided for this result.
 5 *See, e.g., Nat'l Min. Ass'n v. U.S. Dep't of Interior*, 70 F.3d 1345, 1350 (D.C. Cir.
 6 1995) (holding that a party cannot obtain review of the substance of a rule through
 7 the petition process because the statute of limitations period expressly provided that
 8 claims could only be brought against the specific type of rule if the grounds did not
 9 arise until after the statute of limitations period had run). If Congress wants to shield
 10 the substance of an agency rule from judicial review after the statute of limitations
 11 has run, it knows how to do so—by providing that any challenges to the substance
 12 of a rule brought after the statute of limitations period must be on grounds that arose
 13 only after the period had run. *See id.* But neither the statute nor the APA contain an
 14 express limitation analogous to that in *Nat'l Min. Ass'n*. *See* 28 U.S.C. § 2401; P.L.
 15 99-625. Therefore, Congress did not intend the result which the Service presses for
 16 here.

17 The defects in the Service's argument become more apparent when this case
 18 is compared to those in which a plaintiff's claim was dismissed as time-barred
 19 although the particular plaintiff could not have brought her challenge within the
 20 limitations period. *See, e.g., Shiny Rock*, 906 F.2d at 1365-66. In those cases, some
 21 unique fact about the plaintiff caused it to avoid experiencing an injury until after the
 22 _____

23 ² If the fishermen had to file and litigate a petition to rescind the 2012 rulemaking
 24 instead of challenging the 2012 rulemaking directly, that would be a great inequity.
 25 There is no strict deadline for the Service to respond to and comply with a petition.
 26 It could be years before the fishermen get any response from the Service.
 27 *Telecommunications Research & Action Ctr. v. F.C.C.*, 750 F.2d 70, 80-81 (D.C.
 28 Cir. 1984) (holding that an agency's five year delay in responding to an inquiry was
 an unreasonable delay and subject to challenge under the APA). And if the Service
 denied the petition—as the 2012 rulemaking strongly suggests it would—the
 fishermen would then only be back where they are now. But, in the meantime, they
 would have unnecessarily suffered the risk of criminal punishment for pursuing their
 occupations.

1 statute of limitations had run. But the cause of the injury was the rule adopted more
2 than six years earlier.

3 This case is readily distinguishable. The cause of the fishermen's injury is the
4 2012 rulemaking. It threatens their fishery and exposes them to criminal prosecution
5 for pursuing their occupation. 77 Fed. Reg. 75,266. Although the 1987 regulation
6 asserted this authority, it didn't exercise it. 52 Fed. Reg. 29,754. Therefore, the
7 1987 regulation is not the cause of the fishermen's injury. As a result, the recentness
8 of the fishermen's injury is not unique to these plaintiffs. *Noone* experienced an
9 injury as a result of the 1987 regulation's assertion of authority.

10 If the Service's argument was correct, an agency could immunize its actions
11 from judicial review by asserting some authority in a regulation and waiting more
12 than six years to exercise it. For example, the Endangered Species Act provides
13 standards by which the Service must determine whether a species is threatened with
14 extinction and should be subject to the act's protections. 16 U.S.C. § 1533. Could
15 the Service adopt a regulation claiming the power to remove species from the
16 endangered species list based on pure whim and avoid scrutiny if it waited more than
17 six years to do so? Of course, the answer is no. Instead, every time the Service
18 relied on this asserted power to delist a species, that would be a final agency action
19 subject to judicial review under the APA. *Cf. Ctr. for Biological Diversity v.*
20 *Salazar*, 695 F.3d at 904-05 (holding that, although a challenge to a regulatory
21 definition was time-barred, subsequent regulations using that definition could be
22 challenged on the grounds that the definition exceeds constitutional or statutory
23 authority); *EPIC*, 266 F. Supp. 2d at 1123-24 (explaining that the denial of a
24 proposed amendment to a regulation that includes reconsideration of a stale rule is
25 a final agency action that permits a party to challenge the substance of the
26 reconsidered rule).

27 The same logic applies here. The fishermen's challenge is directed at the
28 cause of their injury—the 2012 rulemaking—and was timely filed. *See* Compl. ¶ 1.

PACIFIC LEGAL FOUNDATION
930 G Street
Sacramento, CA 95814
(916) 419-7111 FAX (916) 419-7747

1 | Therefore, this isn't a case where the fishermen have only recently been injured by
2 | a stale regulation. On this point, this case is indistinguishable from *Center for*
3 | *Biological Diversity v. Salazar*, 695 F.3d 893. There, the Ninth Circuit allowed a
4 | challenge to a five-year-old final rule which incorporated a regulatory definition
5 | promulgated thirty years earlier. *Id.* at 904-05. The government moved to dismiss
6 | on the grounds that the plaintiff's argument questioned the legality of the definition
7 | and any such arguments were barred by the statute of limitations. *See id.* But the
8 | court denied that motion, explaining that the statute of limitations only barred the
9 | plaintiff from directly challenging the thirty-year-old rule. *Id.* Any subsequent final
10 | agency action that relied on the definition could be challenged—even on the grounds
11 | that the definition contravenes the statute. *Id.*

12 | **CONCLUSION**

13 | The fishermen filed this challenge to a rulemaking that terminated protections
14 | for their fishery and their livelihoods—protections guaranteed by statute—less than
15 | one year after it became final. Because the statute of limitations afforded them six
16 | years to file this action, their complaint cannot be dismissed as untimely. The
17 | Service's arguments to the contrary ignore the importance of this final agency action.
18 | But in none of the cases that the Service cites did a court dismiss a timely filed
19 | complaint challenging a final rule because its legal arguments imply that an earlier
20 | rule is also illegal. Therefore, the motion to dismiss this complaint as time-barred
21 | must be denied.

22 | DATED: November 14, 2013.
